

Cut labor in half

Excellart's extrusions are available in full lengths or pre-cut knockdown kits with depths from 4" to 20", requiring less fabrication time and ultimately reducing labor costs.

Features

Build any depth

Greater flexibility in cabinets with depths from 1.5" to 24"+.

**Not all face types and cabinet widths are available in these ranges. Please inquire.*

Quicker assembly

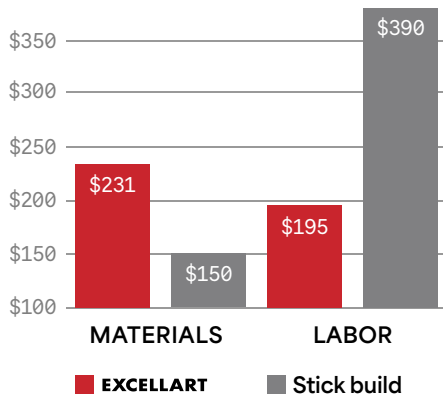

Fewer components and moving parts result in easier assembly and faster completion with less chance of error.

Easier service accessibility

Removable retainers and trims allow for quick access inside the cabinet.

Reduced fabrication times

Pre-cut kits allow faster assembly, reduce labor time, minimize errors, and maintain high quality at high throughput.

Hello! We're Excellart Sign Products, a national supplier of standard and custom aluminum extrusions. With over 50 years of experience, we continue to provide the best quality, value, and service to our customers.

For example, with our ESP-6R kit, you can see a significant cost savings in labor on the left. Although there is a higher cost for materials, the features above reduce overall time and effort to build a 4' x 8' kit by over \$100.
